Language Skills: English (mother tongue), Spanish (fluent), French (conversational)

Relevant Experience

TANZANIA: Inception Phase Solid Waste Management Sector Mentor for Dar Urban Jobs, DFID

Dar Urban Jobs (DUJ) is DFID's first programme applying market systems development to an urban context. The programme short-listed light manufacturing, solid waste management, and child care services as systems important to the urban poor and with growth opportunities. Mentoring support over the six-month inception phase included participating in the market systems analysis and developing micro-pilots and intervention concept notes.

UK: Trainer, Introduction to Market Systems Development, Department for International Development (DFID)

Developed and delivered a five – day training course to nearly thirty DFID, FCO, and CDC employees from both headquarters and field offices. Topics covered included diagnosis, facilitation, and management of market systems programmes as well as specific reflection sessions on implications for DFID.

GEORGIA: Team Leader, Case Study, Media and Information Interventions in Alliances Caucasus Programme, SDC

Supported the development of a case study on the SDC-funded Alliances Caucasus Programme's work in media and information. Few market systems development programmes work on developing media systems, despite the potential ability media has to address constraints at scale. The programme wanted to share its learnings from a decade of working with media to address constraints in various agricultural market systems.

KENYA: Strategy Consultant, Water Market System, Kenya Markets Trust

Reviewed, researched, and updated the water sector strategy for Kenya Markets Trust (KMT). KMT has been working in the urban and rural water sub-sectors for seven years and as part of its institutional evolution, reviewed their sector strategies. The updated strategy includes building on successful innovations introduced to water utilities to improve performance and efficiency, as well as engagements with public agencies responsible for financing infrastructure and regulating service providers. *[June 2018-ongoing]*

CAMBODIA: Author, Case Study, Investing in Infrastructure, DFAT

Researched and authored a learning brief on the DFAT-funded *Investing in Infrastructure (3i)* programme. At its halfway point, the programme wished to document and share the progress and learnings to date from the experience of applying viability gap funding to catalyse private investment in water and electricity services. [March-July 2018]

BANGLADESH: Lead Evaluator, Midterm Review of Sanitation Market Systems Programme, SDC:

Lead evaluator responsible for developing and delivering the midterm evaluation reviewing SDC and UNICEF's sanitation market system programme in six districts of Bangladesh. The review blends market system evaluation criteria, as well as the DAC criteria, and provides both an analysis of progress to date and recommendations for future work. [February 2018-April 2018]

EHTIOPIA: Inception Phase Consultant for Livelihoods Improvements for Women and Youth (LI-WAY)

in Addis Ababa, SNV, Mercy Corps, Technoserve, and Save the Children/SIDA: Supporting the LI-WAY consortium throughout the entire inception phase for the SIDA-funded urban livelihoods programme focused on women and youth in Addis Ababa, Ethiopia. This includes providing training, coaching, in-country technical assistance and backstopping throughout the entire inception phase, from sector selection to market analysis and opening portfolio design. [August 2017-May 2018]

JORDAN: Consultancy supporting Market Assessment and Project Design for the Water Innovations Technologies (WIT) programme, Mercy Corps/USAID:

Supported the WIT programme team advising on detailed assessments of water saving technologies and services markets in both the agriculture/horticulture and the domestic water use and conservation 'systems. WIT aims to enhance water conservation practices in Jordan amongst both agriculture and domestic users, including the growing Syrian refugee population. The input included a mixture of capacity building for the WIT team, guidance for field-based market research, and support to the analysis and interpretation of the data and information generated. Outputs included a comprehensive Market Assessment Report, system vision(s) and opening portfolio design. Recommendations were also provided on operational and implementation priorities. [July - September 2017]

LATIN AMERICA: Reviewer, Energy Efficiency Programme in Artisanal Brick Kilns in Latin America to Mitigate Climate Change (EELA), SDC

Conducted the final external review of an innovative programme financed by the Swiss government to apply market systems thinking to climate change challenges. Following a first phase of technology development and validation, the programme worked with technology providers, financial institutions, and government authorities to encourage the adoption of more energy efficient brick firing technologies in Bolivia, Brazil, Colombia, Ecuador, Mexico and Peru. The review included both an assessment of general DAC criteria (relevance, effectiveness, efficiency, impact, and sustainability), as well as an assessment of the market systems changes facilitated by the programme. [2016 - 2017]

GLOBAL: Trainer, Diagnosing Human Factors in Market Systems Development Programmes

As part of the Springfield Centre's semi-annual training course in systemic change approaches to development, Kate delivers one of the Skills in Use sessions focused on diagnosing behavioural factors in market systems development programmes. [2017-present]

GLOBAL: Trainer, Making Markets Work for the Poor: Introduction to Systemic Change in Sanitation, The Springfield Centre

As part of the Springfield Centre's semi-annual training course in systemic change approaches to development, developed an introductory training to applying systemic change thinking and practice to the sanitation sector. *[2016- present]*

INDIA: Interim Country Director, India, Water For People

Oversaw team of 40+ professionals facilitating water and sanitation services in Bihar, Kolkata, and Odisha states of India during leadership transition. Initiated research into private handpump mechanics, lessons learned from sanitation voucher scheme, and scaling up universal access to rural water services. *[2015 - 2016]*

PERU: "Catalysing Market-based Sanitation" Programme, Water for People

Secured funding from a range of private foundations and multilateral investment to pilot a market-based sanitation programme in Peru's second largest city. Oversaw the implementation of the programme, which included staff training on market systems approaches, identifying private sector partners, persuading financial institutions to offer loans for sanitation products, improving current technical options in the market, and monitoring programme progress. *[2011 - 2014]*

SOUTH AMERICA: Regional Manager, Peru, Water for People South America

Developed innovative WASH strategies, including market-based sanitation approaches, life-cycle costing tools, and self-supply solutions. Line manager for Country Directors in the region and regional office staff responsible for programmatic and operational oversight. Cultivated regional developmental and funding opportunities and built regional relationships with governmental, non-governmental, and private sector stakeholders. Documented and disseminated lessons learned through publications, presentations, and participation in key sector events. *[2008 - 2014]*

BOLIVIA: Supporting Sustainable Sanitation in Peri-Urban Cochabamba, Water for People

Secured funding for an initial pilot of market-based sanitation in peri-urban Cochabamba that included market research, partner identification and linkages, product testing and innovative marketing methods and monitoring. Following two-year pilot, secured additional UN HABITAT funding to expand programme to other areas of peri-urban Cochabamba. *[2009 - 2011]*
